

## 1 Required Equipment

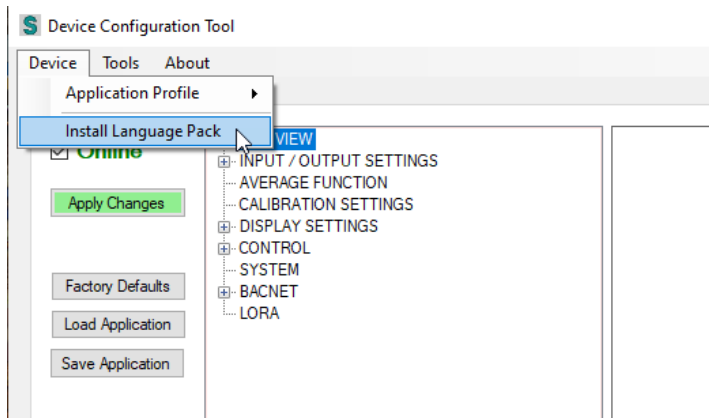

Language Pack is used with the Senticon’s Controllers, User Interfaces and Sensors with Displays, such as TCR10/TCR11 Series Controllers, TER10/MER10/VER10/QUER10/PMR25 Series Smart Room Sensors, TDR20/QDR20 Series Room Interfaces, TCR04/QCR04 Series Room Controllers and TVR20/QVR20 Series VAV Controllers.

To upload the new language file for the display, you need

- USB-to-Serial Converter with the USB Cable or BLE-TOOLSET
- Device Configuration Tool Software for the PC
- Language file (released files are part of the Device Configuration Tool Software Pack)
- Device with Screen

## 2 Installing Language Pack

1. Connect your USB-TO-SERIAL converter or BLE-TOOLSET to the device
2. Run the Device Configuration Tool Software
3. Connect to Device by checking Online box
4. Go to Device / Install Language Pack and Select the Language Pack file to be downloaded

5. Once installed, go to System Menu and set 814 Language Pack Enable = 1 : Enabled
